

Special knotter designed for disposable hygiene industry

KNOTTER 093E

Based on the well-known Loop Knotter type 093, Mesdan developed a **NEW model type 093E**, specifically designed for joining **spandex** for the disposable hygiene industry.

The 093E is a hand-operated knotter distinguished by its reliability, knotting consistency and easy operation. Its main application is the **tail-to-top transfer** on the creels used in the production of **diapers**. It can be easily moved from one position to another, directly clamped to the creel structure or fixed on pre-set brackets.

MESDAN and **The LYCRA Company** are working together to bring this innovation to the disposable hygiene industry.

Different types of fitting...

fast fixing on stationary attachments

movable with quick fixing brackets

Endorsed by **The LYCRA Company**
